Transform your vision with UltraHealth

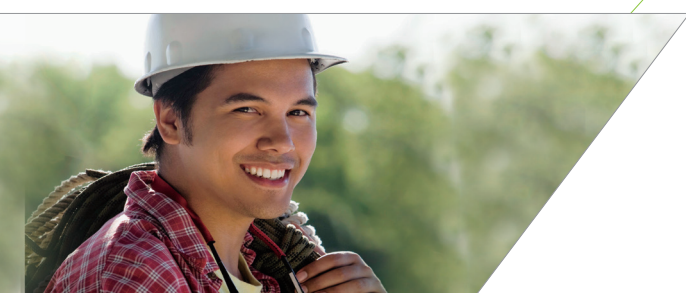

Transform Your Beautiful Life

How well do you see the world around you?

Take your life back with UltraHealth and see with clarity and comfort.

With UltraHealth see the fine points and return to your everyday activities at home, at school or at work.

Transform Your Work Life

Frustrated with your vision?

Whether you are a student or a working adult, UltraHealth will help you back in control of your life.

Experience the thrill of improved vision at work with clear vision and comfort too.

Transform Your Family Life

Tired of the hassles of glasses or contacts?

Appreciate the vision UltraHealth provides while driving or enjoying other family activities. Patients new to UltraHealth experience vision better than their previous lenses.¹

As an added benefit, the soft lens size is familiar to handle, there is minimal dirt and debris entrapment and the lenses won't "pop-out."

Why Choose UltraHealth?

Healthy & Refreshing

UltraHealth is the only keratoconus hybrid contact lens with highly breathable, healthy materials and an advanced lens design especially suited for patients with keratoconus and other corneal irregularities.

UltraHealth corrects vision problems, is healthier for your eyes and delivers exceptional comfort, too.

Crystal Clear Vision & All-Day Comfort

UltraHealth offers a combination of vision and comfort benefits only available in hybrid contact lenses. The rigid lens material optimizes vision; while the soft skirt centers the lens over the cornea, providing enhanced clarity and longer-lasting comfort.

Hassle-Free Wear

UltraHealth is the same size as a soft lens, making it easy to handle, while the soft portion of the lens keeps dirt and debris out and the lens in.

Excellent Ocular Health

UltraHealth is made with materials that allow high oxygen transmission. The lens design promotes tear circulation throughout the day, allowing for all-day wear. And the lens protects your eyes with a UVA & UVB blocker.
