## FAQS

- **What are the common symptoms of dry eye?** Gritty, tired, watery, red, mucous, burning eyes. Eyes glued shut in the morning, itchy eyes or foreign body feeling in the eyes.
- **What are some possible treatments?** Lubricating drops to target the specific type of dry eye, IPL to stimulate the meibomian glands, BlephEx treatment to clean and reset the lid margin, heat and meibomian gland expression, blepharitis and demodex treatments.
- **What will I gain by undertaking in a dry eye suite comprehensive assessment?** Enhanced understanding on the specific type of dry eye you have and targeted treatment plan so a greater chance of success!
- **How long will the comprehensive assessment take?** 30 minutes for the work up. Where possible the report and treatment plan will be devised and discussed in that time, however some cases will require longer depending on complexity.
